

EYELETTED SCREENS

WOVEN WIRE MESH SCREENS WITH EDGE TAPED and EYELETTED

Plastok manufacture and supply a complete range of replacement screens with edges taped with PVC, cotton, Nomex®, etc., to suit the individual application.

Woven wire meshes are available in stainless steel SS 304, 316, high tensile steel, Carbon steel etc.. In apertures ranging from millimetres down to 50 microns.

Screens can be fitted with wear strips, shrouds, edge skirts or other features specific to your product.

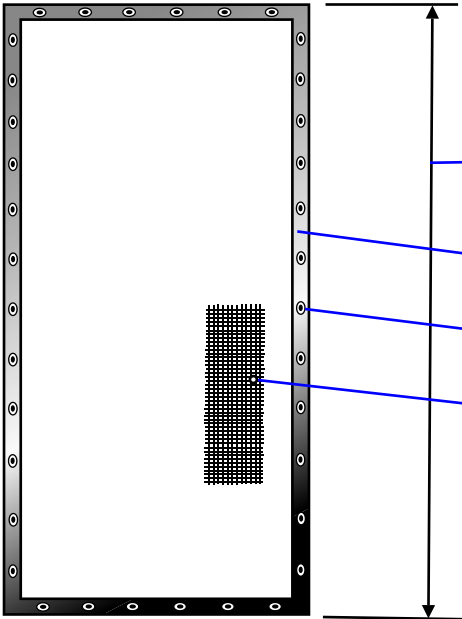

Eyeletted screens can be supplied in synthetic meshes, nylon, polyester, polypropylene, etc., in a full range of apertures.

Plastok also supplies a complete range of hook screens. Please ask for the appropriate leaflet, or phone for details.

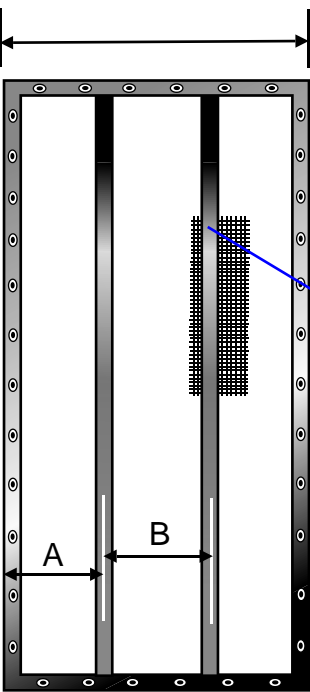

See overleaf for further details

To help you order the screen with your features and requirements mark, fill in, or delete values.
